

Fish

Fish can't live on land. They don't have legs so they can't walk. They must swim. They need to be in the water. Some fish live in fresh water. They live in lakes or rivers. Other fish live in salt water. You'll find them in the sea. Fish look different. They come in all shapes and sizes. They come in all colors. They are the same because all fish live in water.

People can't live in water. Sure, we'll go swimming for a bit. But, then we'll get out and return to land. We won't stay in the water forever. We can't breathe under water. It's hard to imagine the life of a fish. It's hard to think of never leaving the water.
